

HIGH PRECISION LASER EXPERT

Thunder Aurora Laser Series

High precision and high speed laser marking with undoubted safety due to our fully enclosed housing design.

LASER MARKING MACHINE

TECHNICAL DATA OF THE ENGRAVER MACHINE

| Specification | AURORA FIBER | AURORA MOPA | AURORA UV |
|-------------------------|---|-------------------|-------------------|
| Laser power | 50W Q-SWITCH | 100W MOPA | 5W UV |
| Weight | 89.3kg /196.9 lbs | 89.3kg /196.9 lbs | 92.5kg /203.9 lbs |
| Marking Area | 5.9"x5.9"/ 150x150mm | | |
| Max Fil Speed | 7000mm/s | | |
| Max Line Speed | 2000mm/s | | |
| Z-axis | Motorized Z-axis, 16.9"/430mm | | |
| Table | Alumina table, 14.7"x11.3"/375x288mm | | |
| Housing Dimensions | 16.9"x29.7"x31.4"/430mmx755mmx799mm | | |
| Cooling | Air cooled | | |
| Red Dot Pointer | Laser Power<1mW, 630-680nm | | |
| Optional F-theta lenses | 4.3"x4.3"/110x110mm 7.9"x7.9"/200x200mm | | |
| Rotary | Rotary Compatible | | |
| Focus Mode | Auto Focus | | |

FEATURES OF THE AURORA

● Maximize Your Efficiency

Our laser marker adopts a dynamic magnetic structure for the galvanometer motor. This design provides our lasers with excellent stability, high positioning accuracy, fast marking speed, and high interference resistance. With an engraving speed of 7,000 mm/s, Thunder Laser surpasses our competitors. Our innovative motion system and revolutionary drive concept translate to the most efficient production, highest throughput, and greatest profitability for users, all while maintaining impeccable quality.

● Faster and More Precise Performance

We utilize geometric optics in our laser marking machines to ensure faster autofocus performance. This facilitates rapid labeling and minimizes errors. A short burst of light is emitted, directed towards the sensor. Our accurate software measures the time it takes for the light to reach the target object and return. Through contrast testing, our laser has demonstrated faster autofocus speed.

● Large-format Camera

Our large-format camera empowers precise laser marking. It facilitates accurate positioning of artwork on diverse materials or objects, ensuring perfect alignment. With its advanced capabilities, the camera effortlessly traces intricate designs directly from images, simplifying the marking process. Additionally, it offers real-time laser monitoring, enabling users to supervise operations closely. The large-format camera optimizes efficiency and accuracy, making it indispensable for a wide range of marking tasks.
